Apprenticeship Opportunities Are Coming

There will be apprenticeship opportunities coming to Alcoa Inc, Lafayette Operations in 2012. If you think you may be interested in signing up for this program, please read on for more information and to see what the requirements are.

The apprenticeships are 3 year, 6000 hour programs consisting of 5400 hours of on-the-job training and 600 hours of classroom training that will be taken on Company time. Upon completion of the programs an Alcoa and US Department of Labor Journeyman’s card will be issued.

An applicant must be a high school graduate or have a diploma resulting from a general education development (GED) test. In addition, all applicants must have successfully completed two (2) semesters of high school algebra and one (1) semester of geometry or trigonometry, or present proof of a post-secondary equivalent.

The applications will consist of three phases of testing, General Knowledge, Skill Level and Physical Testing.

Once selected, the applicant must take a Compass Test at Ivy Tech on their own time in order to determine if any refresher courses are necessary before beginning the actual apprentice classes.
